

CD i Award winning integrated CD player

Product Information:

Recognised by thirty years of awards and accolades, Cyrus consistently pushes the boundaries of audio technology. We're tirelessly working towards the ultimate hi-fi system, which will reproduce the sound and feeling of a live performance without any interference or loss of detail.

The CD i is an integrated CD player using our award winning Servo Evolution CD engine. It is our best sounding CD player ever. Everything from the power stage through to the analogue output of the machine has been designed with sound quality in mind, and the results will exceed all your expectations.

While the CD i is a high end CD player, it has been designed to introduce new people to the joys of hi-fi. Experience your music in the greatest detail, with easy set up and control.

CD i features and benefits

Servo Evolution:

The new SE platform is quite different because it is specifically engineered to retrieve data from an audio CD with the fewest errors. To provide the ideal data output for hi-fi, Cyrus controls the whole electro mechanical servo system to provide much better quality audio than has previously been possible with conventional drives.

Signature DAC Technology:

Following on from Cyrus' trickle down approach, the CD i features the same 32 bit DAC featured in the DAC XP Signature. The move to 32 bit for Cyrus allows even greater detail retrieval and sonic resolution.

Connectivity:

Twin analogue outputs and digital output allow the CD i to fit into a variety of setups.

Precision Slot Loading Drive:

CD i features the latest generation of our slot load CD technology. This quiet and low contact mechanism provides a myriad of benefits to the traditional tray method of loading a CD, whilst also de-cluttering the front panel for an improved aesthetic.

Upgradability:

The CD i features the PSX-R port for connecting the PSX-R₂. This instant sonic upgrade provides a separate, highly regulated off-board power supply.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products' sound. It's not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.

Suggested Systems

6a+CD i

8a+CD i + PSX-R₂

CD i Specifications

Integrated CD player

32 bit DAC

Servo Evolution technology

Twin analogue outputs

Optical and coaxial outputs

iR14 Remote control included

Dimensions (H x W x D) – 73 x 215 x 360 mm

Weight – 3.6 kg
