

Stream X Signature A streaming transport with reference Signature trademark performance

Product Information:

Recognised by thirty years of awards and accolades, Cyrus consistently pushes the boundaries of audio technology. We're tirelessly working towards the ultimate hi-fi system, which will reproduce the sound and feeling of a live performance without any interference or loss of detail.

Stream X Signature is our highest performance streamer source component; it uses Cyrus' state-of-the-art streaming engine and has been developed to provide the best sound resolution possible from a network audio library. It will fully exploit the highest quality 24-bit/192 kHz files.

Stream from any UPnP or DLNA device, or use one of the streamer's host of additional inputs to play music from your PC or mp3 player. With simple set up, seamless navigation and sensational sound quality, listening to music.

Stream X Signature features and benefits

Advanced Audio Streaming Engine:

Supporting all popular formats, Stream X Signature is able to stream audio from USB, NAS Drives or even iPod devices in high resolution up to 24/192.

Signature Digital Output:

By removing all analogue audio components the Stream X Signature is a pure digital transport. This gives the best performance when using a digital output into Cyrus' high performance DAC's.

Essential Connectivity:

Wi-Fi or Ethernet, integration into your home network is effortless and reliable. Additional sources? No problem, there are 5 digital pass-through inputs, and high performance digital output.

Internet Radio:

If you love radio, you'll love TuneIn radio. With over 100,000 channels available, both local and national, the choice for music is as endless.

Effortless Control:

Once connected, download our free Cadence app from iOS App Store or Google Play Store for a complete and intuitive control system. All key system functions, along with playlist creation and storing favourite internet radio stations, are available when using Cadence.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products’ sound. It’s not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.
