

Stream Xa Award-winning high definition streaming source

Product Information:

Recognised by thirty years of awards and accolades, Cyrus consistently pushes the boundaries of audio technology. We're tirelessly working towards the ultimate hi-fi system, which will reproduce the sound and feeling of a live performance without any interference or loss of detail.

Stream Xa incorporates Cyrus advanced streaming engine with a high quality 24 bit DAC so it can be used as a source in traditional hi-fi systems without the need to invest in a separate high performance DAC.

Our expertly engineered circuitry and DAC (digital to analogue converter) technology means you can stream 24 bit music in high resolution. This high resolution combined with our expert tuning uncovers hidden depths and details in your music, bringing the beat to life. With our Cadence app you can access all of your networked music as well as over 100,000 internet radio stations with ease.

Stream Xa features and benefits

Advanced Audio Streaming Engine:

Supporting all popular formats, Stream Xa is able to stream audio from USB, NAS Drives or even iPod devices in high resolution up to 24/192.

Analogue Output:

A high quality DAC and analogue output allow the Stream Xa to be connected to any hi-fi system. Bringing the latest streaming technology to traditional hi-fi systems, Stream Xa allows you to enjoy 24 bit high resolution music from the latest audio revolution.

Essential Connectivity:

Wi-Fi or Ethernet, integration into your home network is effortless and reliable. Additional sources? No problem, there are 5 digital inputs and fixed analogue outputs. Finally a PSX-R port allows instant upgrade to the sonic performance of the Stream Xa.

Internet Radio:

If you love radio, you'll love TuneIn radio. With over 100,000 channels available, both local and national, the choice for music is as endless.

Effortless Control:

Once connected, download our free Cadence app from iOS App Store or Google Play Store for a complete and intuitive control system. All key system functions, along with playlist creation and storing favourite internet radio stations, are available when using Cadence.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products' sound. It's not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.
