

JBL MP350 Classic

Digital Media Player – Walnut

JBL

The JBL MP350 Classic is inspired by the JBL SA600 amplifier from the 1960's, with retro styling and walnut veneer side panels to make the MP350 Classic the perfect partner for classic and retro Hi-Fi systems. It perfectly matches JBL Classic and Studio Monitor walnut finished loudspeakers on the outside, along with the JBL SA550 amplifier.

On the inside, the JBL MP350 is a streaming music player for the 21st century with an inclusive feature set supporting the majority of smart phones and tables, as well as popular streaming services. Connect the MP350 to your home network with Wi-Fi or Ethernet to enjoy instant playback using Apple Airplay2 or Google Chromecast.

The MP350 will playback music directly from Spotify Connect and Tidal Connect, and for power users, the MP350 is Roon Ready, ALL with Hi-res and MQA support. All digital audio is output on the analog outputs using a reference high resolution DAC with time domain jitter elimination for perfect sound, every time.

Highlights:

- Network Media Player with Classic Styling
- Walnut veneer side panels match JBL Classic and Studio Monitor loudspeakers
- Works with Apple Airplay2 and has Chromecast built in
- Works with Spotify Connect
- Works with Tidal Connect with MQA supported
- Roon Ready
- Supports up to 24 bit / 192 kHz Hi-res audio
- Analog and Digital Outputs
